In order to back up recorded files you need to have a CD-R disc!

1. Open CDRW drive tray and put the CD-R disk in before you start the back up recorded files process.

2. Click backup button.

Enter 1 for password. (Default)

	File types: All Files (*.*)	Add		

Select recorded files you need to add to disk. Highlight the file and click button "Add" or just double click on the file.

If you need to add more files to the disk from a different camera or different day click once on the **Icon** to go back to camera selection folder and select a different camera or click twice to go back to the **Day** selection folder, and repeat the process of adding recorded files to the disk. When finished, click on the **"Finished"** button for the next screen.

On this screen you will see all the recorded files you selected and the space that is used on the disk. Then click "Next"
